DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 1 and 25 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: it is unclear how the cutting assembly is attached to the cutting head to allow for rotation of the cutting head, the applicant has not stated the cutting assembly is rotatable only that it is attached to the cutting head.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 27-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Atkinson et al. 5196020.

6. Atkinson et al teaches a method for processing harvested dermal tissue supported on a cutting surface using a device having a housing that supports a cutting assembly including a plurality of spaced apart cutting blade tips, the method comprising the steps of: bringing the blade tips into contact with the harvested tissue such that the blade tips engage the cutting surface; translating the device along the cutting surface in a first direction to cut through the tissue to produce sliced tissue; further comprising the step of separating the sliced tissue from the cutting assembly; further comprising the step of biasing the sliced tissue towards the cutting surface (col. 1, lines 29-40).

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-32 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-44 of

Art Unit: 3734

copending Application No. 11/398185. Although the conflicting claims are not identical, they are not patentably distinct from each other because the structural and method steps set forth in claims 1-32 of the instant application are also claimed in the copending application, e.g., the copending application disclosed similar limitations, a housing, a handle, a gripping surface, a cutting head, a cutting assembly, a plurality of spaced apart blade tips, and a receptacle.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
